DIVISION OF  
OIL GAS & MINING

RE: Receipt of Ground Water Discharge  
Permit Application for Topaz Beryllium  
Venture

Dear Mr. Prescott:

We have received the application for a ground water discharge permit for beryllium leaching facilities to be located north of Delta, Utah in Millard County. The application is now in the process of review. Completion of the initial review is expected before December 10, 1991. A draft permit will be compiled upon satisfactory resolution of any deficiencies in the application. The fee for permit issuance will be \$7,200. If you have any questions regarding the ground water permitting process please call me at (801) 538-6146.

These facilities will also need to obtain a construction permit before construction may begin. Please contact Kiran Bhayani of this office regarding requirements for this permit.

Sincerely,

*Mark T. Novak*
